

PARTNERSHIPS

Macro Connect is proud to partner with the following companies and services that will help your organization run smoothly and efficiently, allowing you to achieve the best performance possible out of your staff and technology.

SOFTWARE + SERVICES

Microsoft sets the industry standard for office productivity software, workstation/server operating systems, and simple-to-use cloud-based solutions. Microsoft's products allow organizations of every size to achieve breakthrough performance.

N-Able provides the backbone for our Managed Service Provider (MSP) services. Their remote monitoring combines hardware and software monitoring, antivirus, patch management, remote assistance, and more to allow us to provide easy, efficient, support.

Kaspersky Lab is a leading provider of antivirus protection for organizations of all sizes. Their award-winning security suites can protect your organization from malware while also providing advanced features like data encryption, MDM, and more.

SmartDeploy is a disk imaging platform that allows organizations to create a single install image that can be deployed to any model of workstation. This platform allows us to reduce downtime by not wasting resources on hard-to-troubleshoot issues.

AirWatch MDM simplifies the management and tracking of your organization's mobile devices. It supports leading platforms like iOS, Android, Chrome OS, and more, with the ability to manage a mixed environment BYOD or corporately-owned devices.

HARDWARE + NETWORKING

Dell is a leading computer hardware manufacturer in both the consumer and business sectors. Their innovative desktops, all-in-ones, laptops, tablets, and convertibles provide the perfect solution for every end-user. Their line of servers will provide a reliable and expandable backbone for your business.

Macro Connect's partnership with Dell means you will get the solutions you need at prices to match your budget.

Jive Communications is a provider of enterprise-grade hosted VoIP and Unified Communications. Their hosted platform grows with you, making it ideal for organizations of every size, and takes the installation, management, and maintenance of a traditional PBX out of your hands. They partner with industry-leading hardware manufacturers like Cisco, Polycom, and Panasonic to provide solutions for your every need.

Meraki, by Cisco, provides simple, reliable, cloud-managed networking devices to organizations of all sizes. Their product line of APs, switches, and security appliances all integrate into one easy-to-use cloud controller. This makes network management easy and opens the door to powerful reporting and alerts.

SonicWALL

SonicWALL is an industry leader for high-performance network security and data protection solutions. Their advanced devices protect your network and data from unwanted intrusions and malware while also giving you the ability to lock down your internal network through services like content filtering and app control.

EDUCATIONAL TECHNOLOGIES

Canvas, a cloud-based learning management system, simplifies teaching and learning by connecting all of the digital tools that teachers use in one easy place. This powerful instructional tool is used in 1,200+ educational institutions across the nation. We are an official Canvas partner and provide implementation consulting and PD to districts that utilize Canvas.

LearnTrials empowers schools and districts to know which products are best for their classrooms. The research-backed online platform combines teachers' rapid insights with multiple data sources to improve instructional and budget decisions. We partner with LearnTrials to assist in onboarding organizations to this info gathering and decision making platform.

SAFARI Montage provides K-12 school districts with a fully integrated Digital Learning Platform, including a Learning Object Repository, Video Streaming Library, and IPTV & Live Media Streaming. We are a certified professional development provider and we're proud to present on behalf of SAFARI Montage for school districts across the United States.
